About Us

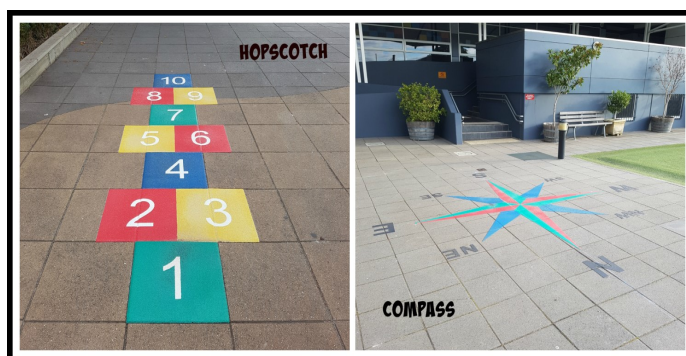

OzMarks is a Melbourne-based Installer and supplier of High Quality Thermoplastic Themed Playground Markings and preform symbols in Australia.

Perfect for Primary Schools, Secondary Schools, Nurseries, Road Markings, Footpaths or anywhere with a surface.

OzMarks can transform a once dull and useless space into a bright and fun area and most importantly aids with education and fitness outside of the classroom. Our playground designers work closely with teachers, parents and children, listening to what you want out of a play area so we can create a stunning play environment suited specifically to your needs.

If you are interested in having OzMarks design a spectacular play area for you, then please don't hesitate to get in touch today and arrange your **free site visit**. You can call our office any time during working hours on 0484 625 199 or email us info@ozmarks.com.au

Our Markings are made from plastic which is heated to adhere to the playground surface.

Although the initial outlay is more expensive than paint, in the long term thermoplastic playgrounds cost less as paint applied to surfaces will fade much quicker and require repainting much sooner than thermoplastic playground markings.

Benefits of using Thermoplastic Markings:

- ♦ Can be laid in relatively short time (minimising disruption in school)
- ♦ Bright colours which remain colourful
- ♦ Adds texture
- ♦ High durability
- ♦ Environmentally friendly
- ♦ Non Skid
- ♦ Can be used within 30 minutes of application
- ♦ Up to 8 times more durable than painted line marking

Logos & Bespoke Designs

Logo & Crests Markings

What does your corporate image show, a blank tarmac area, and tired car parking bays?

At OzMarks we can revitalize your parking area with new refreshing line markings and reproduce most logo designs as preformed thermoplastic markings, a great addition to any company entrance or school.

Manufactured in our own design studio using only the highest grade preformed thermoplastic materials. All installations are fitted using our own fully experienced fitters.

Many companies realize that the benefits of clearly marked parking bays outweigh the cost. And in most cases, using preformed thermoplastic markings works out cheaper than paint as they out last paint by as much as 5-8 years.

Relining Old Markings

Relining Old Markings

Have you got old and worn out floor or playground markings that are no longer serving their purpose?

Here at OzMarks we strive to get the best results for you by covering as much of your old markings as possible and replacing them with new bright and vibrant bespoke thermoplastic designs. Thermoplastic can be fitted on top of most old painted markings or ageing thermoplastic but occasionally (for the best results) the old markings will need to be lifted prior to the new ones being fitted. So if you would like your old markings re-lined like for like or if you would prefer a totally new design to be fitted on top, please get in touch with us and we will be very happy to arrange a site visit so we can discuss the best option for your individual requirements.

FAQ

How is the treatment applied?

The product is heat fused to the surface using heat from a propane gas torch. Check out our video on a hopscotch install on our webpage for more information

www.ozmarks.com.au

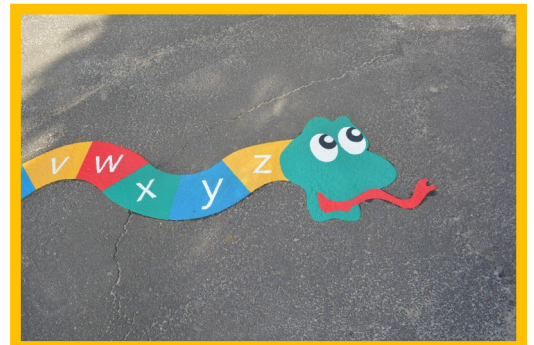

How long do playground markings take to dry?

They don't dry as such, they cool down so (depending on weather) 15 mins to 1 hour is normal. All our work is done outside of school hours and over school holidays.

Delivery Time?

Our Thermoplastic suppliers are located overseas, therefore our supplies are shipped over to us. Unfortunately, this can sometimes lead to delays in receiving the products so to avoid extended waiting periods we recommend booking Thermoplastic works in advance.
